International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 1, ISSUE Nos 1 & 2

and

VOLUME 2, ISSUE Nos 1–4

ISSUE No. 1 July–September 1983

Editorial 1

Letters of Welcome 2

INTELSAT VI. A New Satellite Generation for 1986–2000: P. T. Thompson and E. C. Johnston. . 3

An Introduction to Testing Techniques in the INTELSAT TDMA/DSI System: R. J. Colby, R. Parthasarathy and D. W. Prouse 15

Companded Single Sideband (CSSB) AM/FDMA Performance: S. J. Campanella. 25

Introduction of Companded FDM/FM Operation into the INTELSAT System: B. A. Pontano and G. G. Szarvas 31

Subjective Evaluation of Companded Frequency Modulation and Continuously Variable Slope Delta Modulation Single Channel per Carrier Satellite Communication Systems: N. Abachi and B. G. Evans 39

Demand Assignment for Light-route TDMA: S. S. Kamal, R. Matyas and R. G. Lyons 51

LETTERS TO THE EDITOR 57

BOOK REVIEW 60

FORTHCOMING MEETINGS 61

ISSUE No. 2 October–December 1983

Editorial 63

Satellites and the ISDN: J. Lewis 65

Japanese Commercial TDMA System: R. Suzuki, H. Hayashizaki, T. Mitani and R. Saga 73

An Introduction to Testing Techniques in the INTELSAT TDMA/DSI System (Part 2): R. J. Colby, R. Parthasarathy and A. L. Stimson 81

Satellite Switch State Time Plan Control: S. J. Campanella and T. Inukai 97

Application of 32 and 16 kb/s Speech Encoding Techniques to Digital Satellite Communications: Y. Yatsuzuka, F. Yato and A. Kurematsu 113

Design Considerations for a Larger INMARSAT Standard Ship Earth Station: M. Nouri and M. R. Braine 123

The Smoothed Step-track Antenna Controller: D. J. Edwards and P. M. Terrell 133

Proposed Novel Technique for the Measurement of Antenna Gain in Satellite Earth-stations: P. Daly and D. Tits 141

BOOK REVIEWS 147

CONFERENCE REPORTS 149

FORTHCOMING MEETINGS 152

ISSUE No. 1 January–March 1984

Editorial 1

INTELSAT 2

Satellite Broadcasting: System Concepts and the Television Transmission Standards for Europe: G. J. Phillips and P. Shelswell 3

Satellites for Communications and Broadcasting: The Evolving European Market: R. Morris. . . 9

Telematic Services via Satellite in Europe: C. Goumy and E. Golden 13

A Condensed Orbital History of INTELSAT Satellites: J. G. Walker 23

Leased Services on the INTELSAT System. Part 1: Domestic Service and International Television: T. M. Kelley 29

Multiple-beam Antennas for Contiguous Coverage of Europe for Business Service Applications: B. Claydon, S. E. Dinwiddy and N. Adatia 41

Depolarization Properties of Metal Space Frame Radomes for Use in Satellite Communication Systems: S. Rwabona-Katashaya and B. G. Evans 61

The System Implications of 6/4 GHz Satellite-to-Ground Signal Depolarization Results from the INTELSAT Propagation Measurement Programme: J. E. Alnutt 73

Investigation of 9·6 kb/s Data Transmission via a PCM Link at 64 kb/s With and Without Link Errors: H. Suyderhoud, F. L. Corcoran, D. S. Arnstein and H. Lewis 81

BOOK REVIEW 89

FORTHCOMING MEETINGS 90

ISSUE No. 2 April–June 1984

Editorial 91

INMARSAT Expands Its Horizons: O. Lundberg 93

A Reassessment of Satellite Communications in the 20 and 30 GHz Bands: P. L. Bargellini 101

Estimating the Mass and Power of Communications Satellites: W. L. Pritchard 107

Equalization of TDMA Links using In-service Impulse Response Measurement: B. Mazur and R. Lyons 113

High Speed Receiver Designs based on Surface Acoustic Wave Devices: S. Nanayakkara and J. B. Anderson 121

Viterbi Decoding for Impulsive Interference Satellite Channels: C. Tsai and L. Kurz 129

CONFERENCE REPORT 137

BOOK REVIEWS 139

INFORMATION 141

FORTHCOMING MEETINGS 142

ISSUE No. 3 July–September 1984

Editorial 143

An Introduction to Testing Techniques in the INTELSAT TDMA/DSI System (Part 3): R. J. Colby, R. Parthasarathy and D. W. Prouse 145

CPM—An Efficient Constant Amplitude Modulation Scheme: T. Aulin and C.-E. Sundberg . . . 161

A Rain Attenuation Model for Satellite Link Attenuation Predictions Incorporating the Spatial Inhomogeneity of Rainrate: R. M. Manning 187

REVIEW
Performance of Regenerative/Conventional Satellite Systems: G. Maral and M. Bousquet . . . 199

TUTORIAL
Transmission Systems: An Introduction to Frequency Modulation: W. R. Calvert 209

LIBRARY ON SATELLITE TEXTS 215

FORTHCOMING MEETINGS 216

ISSUE No. 4 October–December 1984

Editorial 217

CPM—The Effect of Filtering and Hard Limiting: T. Aulin and C.-E. Sundberg 219

Loopus Opens a New Dimension in Satellite Communications: P. Dondl 241

Experimental Study and Empirical Evaluation of Carrier Compression and Third Order Intermodulation Products of Unequal Carriers in a Communication Satellite Transponder: D. Rustogi and N. Sengupta 251

An Interactive Computer Program for Elliptical Beam Optimization: M. Richharia 263

Earth-station Size vs. Error-correction Coding in the Design of Ku-band Satellite Communications Systems: V. Mangulis 269

The INTELSAT SPADE System—Ten Years of Demand Assigned Operation: S. Lynn 279

REVIEW
Modulation and Coding: P. G. Farrell and A. P. Clark 287

TUTORIAL
Transmission Systems: An Introduction to Frequency Modulation—Part 2: W. R. Calvert . . . 305

FORTHCOMING MEETINGS 311
